

IS THIS THE WORLD'S BEST LOOKING REVERSE PARKING SYSTEM?

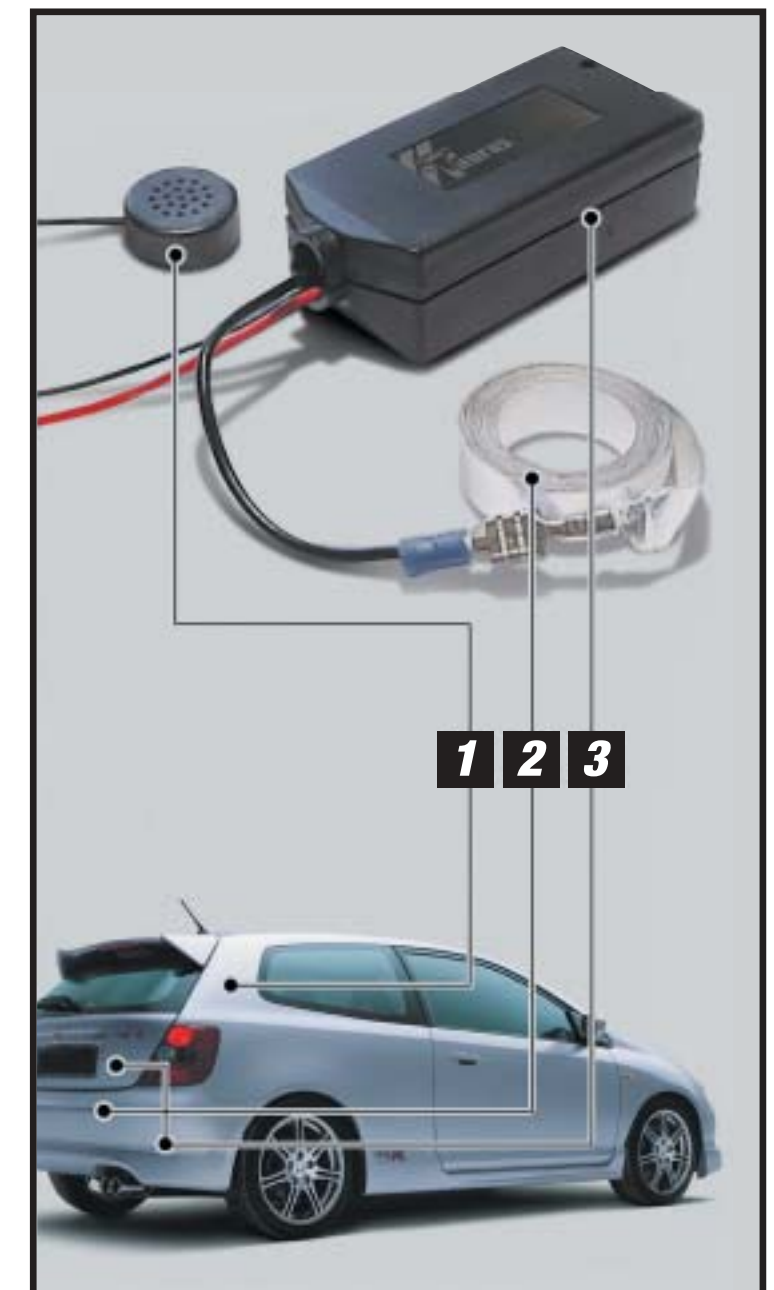

Don't be one of 12,000, \$25 million 'at fault' reversing incidents annually! New Taurus T123 digital electro-magnetic parking system scans the full bumper length, including corners. It mounts inside the bumper – no drilled holes, no unsightly sensors!

T123 fits most vehicles
T123 starts when you select reverse, and emits an electromagnetic field

T123 suits plastic bumpers
T123 changes tone 1-2-3 times as you get closer
T123 detects small objects and high kerbs
T123 is easily fitted

T123 comes in 1-2-3 parts

1. Discreet 20 mm speaker inside vehicle
2. Flexible adhesive antenna inside bumper
3. Compact sensor inside boot

Now parking is as easy as 1-2-3

1. 0.8 to 0.5m – slow “be-be-be” sound

2. 0.5 to 0.25m – faster “be-be-be” sound

3. 0.25 to 0.0m – constant “be” sound

T123 is a parking aid and is not a replacement for driver attention.
The vehicle shown here does not indicate any connection in the course of trade with the manufacturer.
